

Heiner Wedemeyer, MD, is a Professor at the Department of Gastroenterology, Hepatology and Endocrinology, Hannover Medical School, Germany. He leads a research group on cellular immunology and clinical virology of viral hepatitis.

Prof. Wedemeyer received his medical degree from the University of Göttingen in 1996. He trained in Internal Medicine at Hannover Medical School. From 1998 to 2000, he was a research fellow in immunology at the Liver Diseases Branch, National Institutes of Health, Bethesda, USA. In 2001, he returned to Hannover and completed his specialist training in Gastroenterology and Hepatology.

Prof. Wedemeyer is involved in the scientific coordination of the German Network of Competence on Viral Hepatitis (Hep-Net), the German Liver Foundation and the German Hepatitis C Registry. In 2008, he was elected as a Scientific Committee member of the European Association for the Study of the Liver (EASL), and was Secretary General of EASL from 2009 to 2011.

Prof. Wedemeyer has worked on basic and clinical aspects of hepatitis virus infections throughout his career and he has been principal investigator on several clinical trials, focusing on antiviral therapy and immunotherapy in viral hepatitis. He has authored over 275 original articles, 125 reviews and editorials and 60 book chapters, and is the editor of four books. His current Hirsch-Index is 71 (google scholar). He has received numerous awards, including the Innovation Award of the German Medical Faculties (2011) and the Rudolph Schoen Award (2011).
